PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of hands-on experience building scalable React.js SPAs, reusable component libraries, and real-world REST API integrations. Skilled in modern frontend architecture, responsive UI, and performance optimization using Tailwind CSS. Currently expanding expertise into AI-powered web applications by integrating Generative AI APIs (OpenAI/Gemini), building SaaS-style features, and creating intelligent user experiences. Recipient of the Dr. Abdul Kalam Young Achiever Award by World Youth Federation.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Hooks, Context API, Redux

AI & APIs: OpenAI API, Gemini API, REST API Integration, Prompt Engineering, Axios, Fetch

Backend / DB: Node.js (Basic), MongoDB, Firebase (Auth & Firestore), Supabase (Basic)

Tools: Git, GitHub, VS Code, Postman, Figma (Basic), Vercel, Netlify

Practices: Agile/Scrum, Responsive Design, Component-Driven Development, Code Review, CI/CD (Basic)

EXPERIENCE

Frontend Developer – Apprentice | Avitam Technologies (Remote) *Jan 2026 – Present*

- Built and shipped scalable Single Page Applications (SPA) using React.js with functional components, hooks, and optimized state management.
- Developed a reusable component library reducing UI development time by ~30% across projects.
- Integrated multiple REST APIs using Axios and Fetch, implementing loading states, error handling, and JSON parsing for production use.
- Improved app performance by eliminating unnecessary re-renders and optimizing component architecture, resulting in faster load times.
- Collaborated in Agile/Scrum sprints — participating in planning, stand-ups, code reviews, and on-time task delivery.
- Maintained structured Git workflows with feature branches, pull requests, and commit conventions.

Web Developer Intern | Gessdemn Global Services *2025*

- Developed web applications using React.js, Redux, and Context API for state management in a production environment.
- Participated in code reviews, followed frontend best practices, and collaborated with cross-functional teams to deliver features on schedule.
- Built responsive, cross-browser compatible UIs improving overall user experience.

PROJECTS

QuickDraft – AI-Powered SaaS Document Generator | *React.js · MongoDB · OpenAI API*

- Built a full-stack AI SaaS web app enabling users to generate professional documents (resumes, emails, reports) using AI prompt templates.
- Integrated OpenAI API with custom system prompts to produce structured, high-quality document outputs on demand.
- Implemented JWT-based authentication and user-specific document history storage using MongoDB.
- Designed a clean, intuitive UI with one-click export features, reducing document generation time from hours to seconds.

IJEAE – International Journal Website | *React.js · GitHub Actions · FTP Deployment*

- Developed and deployed the official website for an international academic journal ensuring high availability and cross-device accessibility.
- Served as Project Manager, coordinating design, development, and deployment across teams to meet launch deadlines.

- Handled full-stack deployment: domain setup, hosting configuration, server setup, GitHub workflow, and FTP deployment pipeline.
- Achieved 100% responsive layout across mobile, tablet, and desktop using modern CSS and Tailwind CSS.

EDUCATION

Sri Eshwar College of Engineering

2021 – 2025

B.E. in Computer and Communication Engineering • CGPA: 7.24

Nachimuthu Polytechnic College

2018 – 2021

Diploma in Instrumentation and Control Engineering • 75.5%

CERTIFICATIONS

- Building with the Claude API - Anthropic (2026)
- AWS Cloud Technical Essentials – Coursera (2024)
- Foundations of User Experience (UX) Design – Coursera (2024)

ACHIEVEMENTS & PUBLICATIONS

- Dr. Abdul Kalam Young Achiever Award – World Youth Federation (for startup project)
- Published research paper at International Conference on Emerging Research in Computational Science (ICERCS), 2024
